

- 1** Install bottom guide in left and right corners by placing hook **A** in stile.
- 2** Rotating guide until tap **B** enters notch in rail and tap **C** enters notch in stile.
- 3** Press bottom nylon guides down with thumb until guides snap into bottom track.

- 4** Guides will compensate for uneven floor.

To remove, insert screwdriver between guide and track and pry out.

Note:

If stile has been cut down, break off fastening clip **D** using pliers, drill hole and screw into stile **E**.
